Solution:

Mr Lewis seems to want a little basic hands-on on GCP and Setup the billing, fortunately, set up an account with billing is a user-easy method in GCP

Step -1 Setting up an account

URL to be followed for this step: <https://cloud.google.com/>

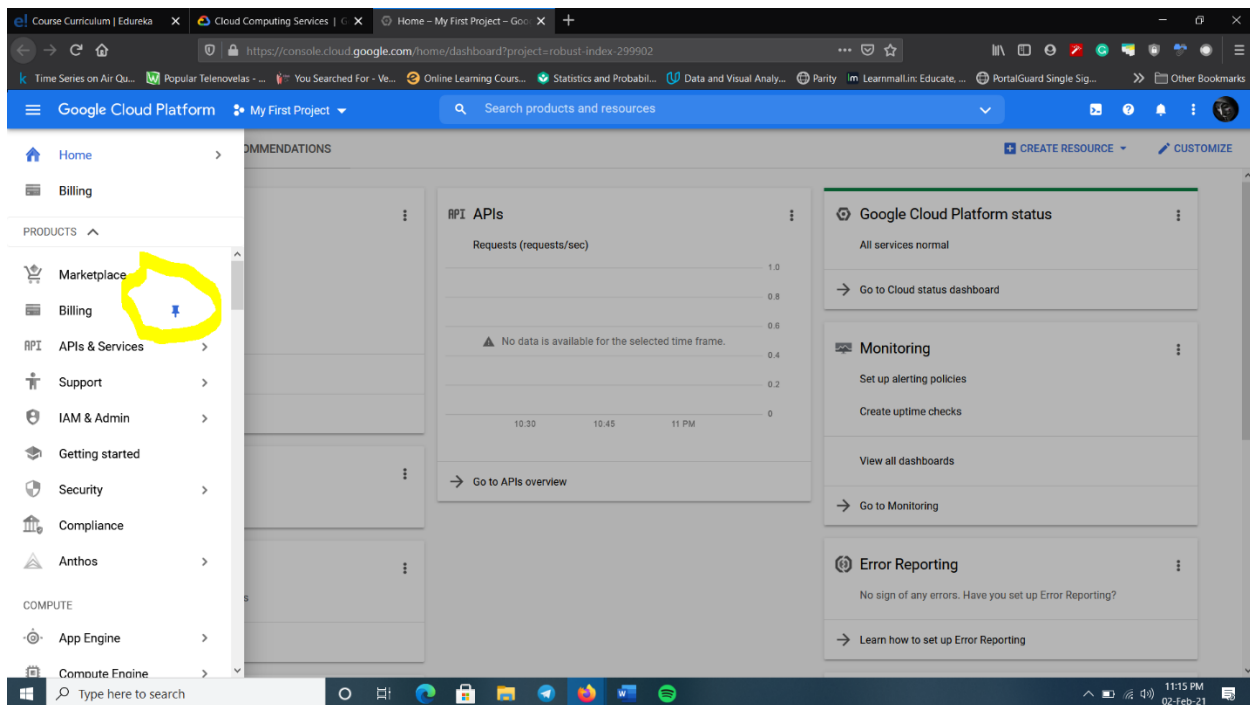

The screenshot shows the 'Step 2 of 2' sign-up page for a Google Cloud Platform free trial. The page is titled 'Try Google Cloud Platform for free' and 'Step 2 of 2'. It includes a warning: 'Your payment information helps us reduce fraud and abuse. You won't be charged unless you turn on automatic billing.' The form has three main sections: 'Account type' (set to 'Business'), 'Business name' (with a text input field), and 'Payment method' (with a 'Card details' input field). To the right, there are three key benefits: 'Access to all Cloud Platform Products', '\$300 credit for free' (valid for 90 days), and 'No autocharge after free trial ends'. The bottom of the page shows a Windows taskbar with various application icons and a system clock indicating 11:12 PM on 02-Feb-21.

After adding the credit card number and info, the user is good to go and google giving 3 months free tails and worth of 300 USD

\

Step: 2

At the upper corner burger menu, user can find the different features of GCP and user can find Billing option and if he wants then he can bin it at the top

Step – 3

To analyze the price and usage, user can find the option called Pricing and also for more details analysis proposed user can download that usage details as CSV file

Step – 4

As a new user, he can use the Getting Started column and there can find the “Take a VM quickstart” and deploy, in that deploy option he can change the os according

to his platform of usability.
